Login Credentials

The Library Management System includes two types of user accounts: **Admin** and **Member** (Student). The **Admin** account is used for managing the entire system. The default login credentials for the Admin are:

- **Username**: admin

- **Password**: adminpass

The **Member** account is designed for students who can borrow and return books. For demonstration purposes, a member account is assigned to **Riya**, with the following login credentials:

- **Username**: 51

- **Password**: iloveyou

These credentials are provided to facilitate testing and demonstrate the basic functionality of the system.
